

Pipeline Technology Conference Proceedings

9-13 May, 2004, Ostend, Belgium

Volume 1

Session 1: KEYNOTE LECTURES 1

Improving long distance gas transmission economics: X120 development overview	3
<i>C.W. Petersen, K.T. Corbett, D.P. Fairchild, S. Papka, and M.L. Macia, ExxonMobil Upstream Research Co, Technology Applications Division, Houston, USA</i>	
Application of X80 in Japan: summary	31
<i>T. Masuda, Pipeline Dept., Tokyo Gas Co. Ltd, Tokyo, Japan</i>	
<i>T. Watanabe, N. Hagiwara, H. Yatabe, S. Kawaguchi, H. Motohashi, and N. Fukuda, Pipeline Technology Center, Tokyo Gas Co Ltd, Yokohama, Japan</i>	
The situation of advanced grade pipe steel in China	41
<i>Y. Wang, Institute of Metal Research, Chinese Academy of Science (CAS), Shenyang, PR China</i>	
<i>J. Pan, Pipeline Bureau, China National Petroleum and Gas Company (CNPC), PR China</i>	
Dealing with present contracting philosophies of the oil and gas companies	55
<i>E. P. Heerema, Allseas Group SA, Chatel-St-Denis, Switzerland</i>	

Session 2: PLASTIC DESIGN 1 63

Yield strength and plasticity of high strength linepipe	65
<i>A. Glover and B. Rothwell, TransCanada PipeLines Ltd, Calgary, Canada</i>	
Ductile fracture behavior of girth welded joints and strain based design for high strength linepipes	81
<i>N. Ishikawa, S. Endo, and S. Igi, Steel Research Laboratories, JFE Steel Corporation, Fukuyama, Japan</i>	
<i>A. Glover and D. Horsley, TransCanada PipeLines Ltd, Calgary, Canada</i>	
<i>M. Ohata and M. Toyoda, Graduate School of Engineering, Osaka University, Osaka, Japan</i>	
A plastic collapse solution for API 5L X65 gas pipeline	99
<i>J.-H. Baek and W.-S. Kim, Research and Development Centre, Korea Gas Corporation, Ansan, Korea</i>	
<i>J.-B. Choi, School of Mechanical Engineering, Sungkunkwan University, Suwon, Korea</i>	

Session 3: LASER WELDING – LAWPIPET PROJECT 115

Longitudinal welding by laser and/or plasma-laser process of high grade pipelines up to 16 mm thick for energy transport	117
<i>C. Vigreux, J. Claeys, A. Ihasn Koruk, Innovation R&D Arcelor, France</i>	
<i>F. Briand, Air Liquide, Cergy-Pontoise, France</i>	
<i>J.P. Mas, J.Y. Goalabre, Saipem SA St. Quentin Yvelines, France</i>	
<i>A. Tazedakis, Corinth Pipeworks, Domvrema, Greece</i>	
<i>C. Gérardin and A. Chehaibou, Institut de Soudure, Yutz, France</i>	
<i>R. Denys, A. Lefevre, Laboratorium Soete, Universiteit Gent, Belgium</i>	
<i>E. Torstad, DnV, Hovik, Norway</i>	
Fracture initiation resistance and plastic straining capacity of longitudinally laser welded pipes containing flaws	135
<i>A. Lefevre, R. Denys, W. De Waele, Laboratorium Soete, Universiteit Gent, Belgium</i>	
Induction preheating and laser welding of high grade pipelines for energy transport: welding process optimisation	153
<i>C. Gérardin and A. Chehaibou, Institut de Soudure, Yutz, France</i>	

Session 4: PLASTIC DESIGN 2 ... 161

An engineering approach to the prediction of the tolerable defect size for strain based design 163
R. Denys, W. De Waele, A. Lefevre, and P. De Baets, Laboratorium Soete, Universiteit Gent, Belgium

Plastic straining capacity of axially loaded pipelines, experimental facts and critical considerations 183
R. Denys, W. De Waele, A. Lefevre, and P. De Baets, Laboratorium Soete, Universiteit Gent, Belgium

Weld strength mismatch effects on plastic straining capacity of axially loaded pipelines 209
R. Denys, W. De Waele, A. Lefevre, and P. De Baets, Laboratorium Soete, Universiteit Gent, Belgium

Tensile strain limits of girth welds with surface-breaking defects
Part 1: An analytical framework 235
Part 2: Experimental correlation and validation 251
Y.-Y. Wang and W. Cheng, Engineering Mechanics Corp. of Columbus, Columbus, USA
D. Horsley, A. Glover, and J. Zoe, TransCanada PipeLines Ltd, Calgary, Canada
Martin McLamb, BP, Aberdeen, UK

Weld mismatch effects on the strain behaviour of flaws in X100 (Grade 690) pipe and girth welds 267
Y.-Y. Wang, Engineering Mechanics Corp. of Columbus, Columbus, USA
D. Horsley, TransCanada PipeLines Ltd, Calgary, Canada

Weld area mismatch and pressure effects in strain-based design 279
W. Mohr, EWI, Columbus, USA

Strain based design guidelines for pipeline girth welds 291
B. Mohr, EWI, Columbus, USA
R. Gordon, EWI Microalloying, Houston, USA
R. Smith, UD Dept. of Transportation, Washington, DC, USA

Session 5: PIPELINE WELDING.. 313

Developments in the application of MIAB welding of pipelines 315
L. Fletcher, C. Stubbs and G. Stecher, MIAB Pipeline Technology Pty Limited, Bright, Australia

Friex - Friction welding of pipeline girth welds 325
P. Afschrift, Denys NV, Gent-Wondelgem, Belgium
P. De Baets and W. De Waele, Laboratorium Soete, Universiteit Gent, Belgium
K. Faes, Belgian Welding Institute, Gent, Belgium

Recent tandem welding developments for pipeline girth welding 335
S.A. Blackman and T.Liratzis, Cranfield University, Bedford, UK
R. Howard adn M.G.Hudson, BP, Sunbury, UK
D.V. Dorling, TransCanada PipeLines Ltd, Calgary, Canada

Mechanised welding on in-service pipelines 357
S.A. Blackman and R.Holdstock, Cranfield University, Bedford, UK
W.A. Bruce, EWI, Cleveland, USA
D.V. Dorling, TransCanada PipeLines Ltd, Calgary, Canada

Validation of an in-situ weld repair procedure for "old" cellulosic pipeline girth welds 373
W.N. Schipaanboord, Nederlandse Gasunie, Groningen, Netherlands
R. Denys, W. De Waele, and A. Lefevre, Laboratorium Soete, Universiteit Gent, Belgium

Novel arc welding developments for pipeline root welding 389
S.A. Blackman, Cranfield University, Bedford, UK, J. Norrish, Univ. of Wollongong, Australia, and D.D.Harwig, EWI, Columbus, USA

Evaluation of brittle fracture performance of girth welded joints by beam welding 403
M. Toyoda, M. Ohata, Osaka University, Osaka, Japan
N. Ishikawa, T. Shinmiya, JFE Steel Corp, Fukuyama, Japan
M. Koçak, GKSS Research Center, Geesthacht, Germany

Session 6: DUCTILE FAILURE AND CRACK ARRESTORS..... 421

Application of X80 into Japan: Fracture control 423
S. Kawaguchi et al., Tokyo Gas Co, Pipeline Technology Center, Yokohama, Japan

A study of ductile failure processes in high strength
linepipe using damage mechanics methods 441
R.M. Andrews, Advantica Technologies, Loughborough, UK
S.H. Hashemi, I.C. Howard, and J.R. Yates, University of Sheffield, UK
A. Edwards, Exploration & Production Technology Group, BP Exploration, Sunbury on Thames, UK

Ductile fracture resistance characterization measurement
improvements..... 457
N. Pussegoda, A. Fredj, and A Dinovitzer, BMT Fleet Technology Ltd, Kanata, Canada
A. Glover, D. Horsley, and L. Carlson, TransCanada PipeLines, Calgary, Canada

Fracture propagation resistance evaluation of X100 TMCP
steel pipes for high pressure gas transportation pipelines by
full scale burst tests 467
*G. Demofonti, G. Mannucci, and M.Di Biagio, Centro Sviluppo Materiali - Tenaris Group, Products
Application, Rome, Italy*
H.-G. Hillenbrand, Europipe GmbH, T.S., Ratingen, Germany
D. Harris, Corus Tubes, Hartlepool, UK

Crack arrestor design by finite element analysis for X100
gas transportation pipeline 483
*G. Mannucci, M. Di Biagio, and G. Demofonti, Centro Sviluppo Materiali - Tenaris Group, Products
Application, Rome, Italy*
A.Fonzo and P.Salvini, University of Rome, Italy
A. Edwards, Exploration & Production Technology Group, BP Exploration, Sunbury on Thames, UK

Crack arrestors 501
H.-G. Hillenbrand, Europipe GmbH, Ratingen, Germany
H. Brauer and G. Knauf, Salzgitter Mannesmann Forschungsinstitut GmbH, Duisburg, Germany

Design basis for fracture arrestors in gas transmission pipelines 515
B.N. Leis, X.K. Zhu, T.P. Forte and B.C. Glenn, Battelle, Columbus, USA

Volume 2

Session 7: OLD PIPELINES AND PLASTIC COLLAPSE 535

Assessment of mechanical properties in pipelines of unknown
provenance 537
B.L. Jones, GE Energy Oil & Gas, PII Pipeline Solutions, Cramlington, Northumberland, UK

External MIC leads to reformulation of inspection program 549
W. Sloterdijk, R. Boekholt and H.D. de Haan, Gastransport Services, Groningen, The Netherlands

Awareness of unexpected pipeline integrity threats 557
*H.D. de Haan, W. Sloterdijk and R. Boekholt, Safety Department, Gastransport Services, Groningen,
Netherlands*

Assessment of older pipelines - Part 1: Proposed methodology
and statistical approach 565
P. Roovers, Fluxys, Belgium
R. Denys and A. Lefevre, Laboratorium Soete, Universiteit Gent, Belgium
B. Leis, Battelle, Columbus, USA
J. Van Dijck, Probabilitas, Leuven, Belgium

Assessment of older pipelines - Part 2: Validation of initiation
and propagation models..... 581
P. Roovers, Fluxys, Belgium
R. Denys and A. Lefevre, Laboratorium Soete, Universiteit, Belgium
B. Leis, Battelle, Columbus, USA
J. Van Dijck, Probabilitas, Leuven, Belgium

Local buckling and post-buckling behaviour of high strength linepipe	593
<i>T. Zimmerman and C. Timms, C-FER Technologies, Edmonton, Canada</i>	
<i>A. Glover, and J Zhou, TransCanada PipeLines Ltd, Calgary, Canada</i>	
<i>N. Suzuki, JFE R&D Corporation, Kawasaki, Japan</i>	
Session 8: PIPELINE INSPECTION 1.....	605
Digital radiography in NDT applications	607
<i>E. Deprins, GEIT, Agfa Gevaert, Mortsel, Belgium</i>	
Introduction of inspection of butt welded joints by the in-pipe camera system	615
<i>H. Morisaki, M. Kon and M. Tunazaki, Osaka Gas Co Ltd, Osaka, Japan</i>	
<i>Y. Kayamori, Nippon Steel Corporation, Japan</i>	
Validation of current approaches for girth weld defect sizing accuracy by pulse-echo, time-of-flight diffraction, and phased-array mechanized ultrasonic testing	627
<i>M. Lozev and R. Spenser, Edison Welding Institute, Columbus, USA</i>	
<i>D. Hodgkinson, TransCanada PipeLines Ltd, Calgary, Canada</i>	
<i>B. Gremmet, BWX Technologies, Lynchburg, USA</i>	
Automated ultrasonic testing and high-performance pipelines: bridging the gap between science and practice	643
<i>T. Bouma, KontrollTechnik Benelux, Naaldwijk, Netherlands</i>	
<i>R. Denys, Laboratorium Soete, Universiteit Gent, Belgium</i>	
Integration of automated ultrasonic testing and engineering critical assessment for pipeline girth weld defect acceptance	655
<i>R.M. Andrews, Advantica, Loughborough, UK</i>	
<i>L.L. Morgan, MIC Ltd, Nottingham, UK</i>	
Inspecting seamless pipe welds of variable wall thickness using ultrasonic phased arrays	669
<i>M. Moles, R/D Tech, Mississauga, Canada</i>	
<i>D. Stewart and M. Gray, Oceaneering OIS, Aberdeen, UK</i>	
<i>H. Godenot and H. Romazzotti, Total, Paris and Pau, France</i>	
Session 9: FULL SCALE AND FATIGUE BEHAVIOUR	683
Deep water girth welds - a compromise between stress and flaw	685
<i>F. Terhoeve, Heerema Marine Contractors, Leiden, Netherlands</i>	
Constraint effects on linepipe toughness	703
<i>G. Shen and W.R. Tyson, CANMET, Natural Resources Canada, Ottawa, Canada</i>	
<i>A. Glover and D. Horsley, TransCanada PipeLines Ltd, Calgary, Canada</i>	
In-plane resonance frequencies of a deepwater suspended pipeline during J-lay	721
<i>R.H.M. Ogink, Delft University of Technology, Delft, Netherlands</i>	
<i>P. Liu, Intec Engineering, Delft, Netherlands</i>	
Longitudinal welded pipes with enhanced fatigue strength pipe	735
<i>M. Erdelen-Peppeler, G. Knauf, and U. Marewski, Salzgitter Mannesmann Forschungsinstitut GmbH, Duisburg, Germany</i>	
<i>O. Reepmeyer, Europipe GmbH, Ratingen, Germany</i>	
Studies on collapse testing of UOE linepipe for deepwater applications ...	753
<i>U. Marewski, Salzgitter Mannesmann Forschungsinstitut GmbH, Duisburg, Germany</i>	
<i>D. De Geer, C-Fer Technologies, Edmonton, Canada</i>	
<i>H.-G. Hillenbrand, Europipe GmbH, Mulheim, Germany</i>	
<i>B. Weber and M. Crawford, BP-EPT – Offshore Systems, Sunbury, UK</i>	
Cyclic deformability of steel pipes with local metal loss and aseismic performance of repair methods	773
<i>M. Miwa and T. Kurobe, Toho Gas, Nagoya, Japan</i>	
<i>N. Oguchi, Tokyo Gas Co, Tokyo, Japan</i>	
<i>Y. Okajima, Osaka Gas, Osaka, Japan</i>	

Session 10: X100 AND X120 PIPELINE STEELS 787

Microstructural aspects of high strength pipeline girth welds 789
N.V. Bangaru, J.Y. Koo and A. Ozeckin, Corporate Strategic Research, ExxonMobil Research and Engineering Co, Annandale, USA
D.P. Fairchild and M.L. Macia, ExxonMobil Upstream Research Co, Houston, USA

Production and development of pipes for conductors and risers
with strength level X80 and X100 without pipe expansion 809
P. Fluess and V. Schwinn, AG der Dillinger Huttenwerke, Dillingen, Germany
K. Buch, Eisenbau Kramer, Hilchenbach-Dahlbruch, Germany

Development of grade X120 pipe material for high pressure
gas transportation lines 823
H.-G. Hillenbrand, Europipe GmbH, Ratingen, Germany
A. Liessem, Europipe GmbH, Mulheim, Germany
K. Biermann and C.J. Heckmann, Salzgitter Mannesmann Forschungsinstitut GmbH, Duisburg, Germany
V. Schwinn, AG der Dillinger Huttenwerke, Dillingen, Germany

Bainitic steel plates for X100 and X120 837
V. Schwinn, P. Fluess and K.-H. Tacke, AG der Dillinger Huttenwerke, Dillingen, Germany
S. Zajac, Swedish Institute for Metals Research, Stockholm, Sweden

Metallurgical design of high strength steels and development
of X120 UOE linepipe 851
H. Asahi et al., Nippon Steel Corporation, Technical Development Bureau, Kimitsu Works, and Pipe & Tube Division, Chiba, Japan

Session 11: CORROSION AND MECHANICAL DAMAGE 873

The failure assessment for gas pipeline with multi-corroded
regions and with corroded defects in the welded region 875
Y.K. Lee, M.W. Moon, and K.H. Oh, Seoul National University, Korea
Y.P. Kim and W.S. Kim, Korea Gas Co R&D Centre, Korea

Reeling-induced residual stresses and its effect on the fracture
behaviour of pipes with through-thickness cracks 887
Z.L. Zhang, Norwegian University of Science, Norway
E. Ostby, B. Nyhus, and J. Odegard, SINTEF Materials Technology, Norway
R. Verley, Statoil, Norway

Residual stress and distortion by pipeline welding 897
M. Mochizuki and M. Toyoda, Department of Manufacturing Science, Graduate School of Engineering, Osaka University, Osaka, Japan

An experimental and analytic approach for predicting the formation
of dent and gouge damage on gas pipeline by an excavator 917
G. Malatesta, G. Mannucci, and G. Demofonti Centro Sviluppo Materiali - Tenaris Group, Products Application, Roma, Italy
L. Barsanti, Snam Rete Gas, Milan, Italy

Exploratory study on the hooking of pipelines by excavating machines ... 933
R. Champavere and M. Zarea, Gaz de France, , Negoce and St Denis La Plaine, France

Ductile fracture model for a pipe with a dent 949
I.V. Orynyak and A.V. Bogdan, Institute for Problems of Strength, Kiev, Ukraine
V.V. Rozgonyuk, Gastransit, Kiev, Ukraine

Session 12: PIPELINE MANAGEMENT AND DEVELOPMENT..... 961

Goal based regulation of pipelines in Canada 963
K. Paulson, National Energy Board, Regulatory Development Team, Calgary, Canada

Managing Australia's thin wall high strength pipelines:
Australian pipeline research 975
M.J. Kimber, M.J. Kimber Consultants Pty, Garran, Australia
L. Fletcher, MIAB Technology Pty Ltd, Australia
I. Haddow, Australian Pipeline Industry Association, Australia

Using benchmarking to optimise the cost of pipeline
integrity management 995
J. Healy, D.G. Jones, A.J. Clyne, P.B. Cazenave and D. Alkazraji, GE Energy, Oil & Gas, PII Pipeline Solutions, Cramlington, UK

Getting a pipeline archive into a GIS1009
I. Peeters, Globe nv, Zandhoven, Belgium

Canadian pipeline safety performance indicators1021
K.Duckworth and K.Paulson, National Energy Board, Regulatory Development Team, Calgary, Canada

Realise the value of pipeline data management across the enterprise
by exploiting legacy databases1031
S. Clouston, J. Smith, and D.Book, GE Energy

Safety assessment for the DONGFANG 1-1 pipeline installation1045
L. Zhang, Y. Zhang, L. Huo and C. Deng, College of Material Science and Engineering, Tianjin University, Tianjin, P.R. China
B. Bai, X. Li and J. Cao, China Offshore Oil Development and Engineering Corp., Tanggu, P.R. China

Lowering a 42-in in-service pipeline in an estuary crossing1061
J. de la Motte, de la Motte & Partner, Reinbek, Germany
J. Spiekhout and S. Stratingh, Gasunie - Gastransport Services, Groningen, Netherlands
H. Lentfert and L. Verwaal, Visser & Smit Hanab, Papendrecht, Netherlands

Volume 3

Session 13: PIPELINE STEEL PROPERTIES1075

Effect of boron addition on the toughness and the microstructure
of the seam weld metal1077
M. Hamada, S. Okaguchi, and Y. Komizo, Sumitomo Metal Industries, Corporate Research Labs, Amagasaki, Japan
A. Yamamoto, N. Takahashi, and T. Ikeda, Sumitomo Metal Industries Ltd, Kashima Steel Works, Japan
I. Takeuchi, Sumitomo Metal Industries, Tokyo, Japan

Microstructure and mechanical properties of API X80 grade
C-Mn-Nb-V-Mo linepipe steel.....1089
J.-Y. Yoo, S.-S. Ahn, and W.-Y. Choo, Technical Research Laboratory, POSCO, Pohang, Korea

Application of X80 in Japan: weldability1099
H. Motohashi and N. Hagiwara, Tokyo Gas Co, Yokohama, Japan
T. Masuda, Japan Gas Association, Tokyo, Japan

Microstructure and toughness in the CG HAZ of X80 pipe steel1117
X. Xiaohuai, Q. Bainian, L. Jingli, S. Yiyin, and W. Yikang, Shanghai Jiaotong University, Shanghai, P.R. China
L. Songnian, Institute of Metal Research, Academia Sinica, Shenyang, P.R. China

Session 14: PIPELINE INSPECTION 2.....1127

The status of in-line inspection for cracks in pipelines1129
K. Reber and M. Beller, NDT Systems & Services AG, Stutensee, Germany

On-line inspection vs quality management1139
M. Celant and F. Trentin, Pipe Team, Milan, Italy

Independent experimental verification of the sizing accuracy of magnetic flux leakage tools	1149
<i>S. Westwood and S. Cholowsky, BJ Pipeline Inspection Services, Calgary, Canada</i>	
Session 15: WELDING CONSUMABLES.....	1159
Limitations of cellulosic-coated electrodes for heavy-wall pipe and fittings	1161
<i>M.Q. Johnson, Los Alamos National Laboratory, Los Alamos, USA</i>	
<i>W.A. Bruce, EWI, Columbus, USA</i>	
The development of welding material for high strength pipe steel	1177
<i>X. Xiaohuai, Q. Bainian, Y. Shaofei, L. Quan, and G. Xuming Shanghai Jiaotong University, Shanghai, P.R. China</i>	
<i>L. Songnian, Institute of Metal Research, Academy of Science, Shenyang, P.R. China</i>	
Selection of welding consumables for higher strength pipelines	1187
<i>M.G. Hudson, BP Exploration Operating Co, Sunbury on Thames, UK</i>	
<i>S.A. Blackman, Cranfield University, Bedford, UK</i>	
<i>J. Hammond, Consultant, Baldock, UK</i>	
<i>D.V. Dorling, TransCanada PipeLines Ltd, Calgary, Canada</i>	
Welding consumables for cost-effective pipelines	1207
<i>D. J. Widgey, ESAB Group (UK) Ltd, Waltham Cross, UK</i>	
<i>M. Amata and D. Meyer, The ESAB Group Inc.</i>	
Welding of thin-walled pipes of steel grade X70 resp. L485	1223
<i>W. Berger, H. Koningshofer, and M. Fiedler, Bohler Schweisstechnik Austria GmbH, Kapfenberg, Germany</i>	
Predicting the HAZ hardness of pipeline and tap fitting steels with artificial neural networks	1233
<i>Z. Sterjovski, D. Nolan, D. Druce, and J. Norrish, University of Wollongong, Australia</i>	
Session 16: PIPELINE PROPERTIES AND Y/T RATIO	1247
Understanding the hydrostatic strength test	1249
<i>M. Law, Australian Nuclear Science and Technology Organisation, Materials Division, Menai, Australia</i>	
<i>L. Fletcher, MIAB Technology Pty Ltd, Australia</i>	
<i>G. Gentles, Agility Management Pty Ltd, Australia</i>	
Influence of thermal treatment on mechanical properties of UOE linepipe	1263
<i>A. Liessem and M.K. Graef, Europipe GmbH, Ratingen, Germany</i>	
<i>G. Knauf and U. Marewski, Mannesmann Forschungsinstitut GmbH, Duisburg, Germany</i>	
Evaluation of the effect of yield to tensile ratio on the structural integrity of an offshore pipeline by a limit state design approach	1283
<i>G. Mannucci, L. Di Vito, and G. Malatesa, Centro Sviluppo Materiali, Tenaris Group, Products Application, Rome, Italy, and A. Izquierdo, Tamsa, and G. Cumino, Dalmine</i>	
Factors affecting pipeline failure strain	1305
<i>M. Law, Australian Nuclear Science and Technology Organisation, Materials Division, Menai, Australia</i>	
<i>L. Fletcher, MIAB Technology Pty Ltd, Australia</i>	
<i>G. Bowie, Bluescope Steel, Australia</i>	
EPRG proposal for a maximum yield/tensile ratio in the European linepipe code EN10208-2	1317
<i>W. Sloterdijk, Gastransport Services (NV Nederlandse Gasunie), Groningen, Netherlands</i>	
<i>T. Zimmerman, C-Fer Technologies, Edmonton, Canada</i>	
The yield to tensile ratio effect on the structural reliability of linepipes with degfects subject to different loads	1333
<i>H.A. Ernst, J.A. Villasante, and R. Bravo, Tenaris Group, Buenos Aires, Argentina</i>	
<i>A. Izquierdo, Tenaris Group, Veracruz, Mexico</i>	
Bending capacity of high strength linepipe	1361
<i>N. Suzuki, JFE R&D Corporation, Kawasaki, Japan</i>	
<i>A. Glover, J. Zhou, and K. Adams, TransCanada PipeLines Ltd, Calgary, Canada</i>	
<i>M. Toyoda, Osaka University, Osaka, Japan</i>	

Session 17: PIPELINE DESIGN..... 1375

Application of X80 into Japan: Earthquake resistance1377
H. Yatabe, N. Fukuda, and T. Masuda, Pipeline Technology Center, Tokyo Gas Co Ltd, Yokohama, Japan
M. Toyoda, Osaka University, Osaka, Japan

Strength and safety of gas pipelines through engineering design1393
R.F. Loeches, Repsol-Enagas, Madrid, Spain

The classical approach to end-effect analysis of elastic pipe bend1405
I. V. Orynyak and S. A. Radchenko, Institute for Problems of Strength, Kiev, Ukraine
V. V. Rozgonjuk, Nafto-Gas Ukrainy, Kiev, Ukraine

On the numerical calculation of collapse and collapse propagation
pressure of steel deepwater pipelines under external
pressure and bending: experimental verification of the finite
element results1417
R.G. Toscano, L. Mantovano, and E.N. Dvorkin, Tenaris Group, Center for Industrial Research, Campana, Argentina

Design and development of pipe-in-pipe systems for ultra-deepwater
applications1429
B. Peacock, Corus R.D.&T., Hartlepool, UK

Construction of a transmission pipeline in Japan's
hostile environments1439
D. Terai, Osaka Gas Co Ltd, Kusatsu, Japan

World's first 18-in reeled pipe installation1455
G. Brown and P. Thomson, Technip Offshore
M. Fryer, Corus Tubes Ltd, Hartlepool, UK

Finite element modelling of buried steel pipelines in settlement areas....1471
M. A. N. Hendriks, C.M.P. Hart, and C.M. Frissen, TNO Diana, Delft, Netherlands

Session 18: FITNESS-FOR-PURPOSE1485

An overview of the pipeline defect assessment manual1487
A. Cosham, Penspen Integrity, and Cambridge University Engineering Department, Cambridge, UK
P. Hopkins, Penspen Integrity, Newcastle upon Tyne, UK

Failure assessment diagram for assessing cracks in a weldment
heat-affected-zone of a natural gas pipeline1503
W.-S. Kim and J.-H. Baek, Research and Development Center, Korea Gas Corporation, Ansan, Korea
D.-I. Kwon, School of Materials Science and Engineering, Seoul National University, Seoul, Korea

Integrity of reduced pressure electron beam girth welds
for deepwater pipelines1517
H. G. Pisarski and C. Punshon, TWI Ltd, Cambridge, UK

Verification of fracture toughness and defect tolerance of X120
girth welds1529
M.L. Macia, S.D. Papka, and D.P. Fairchild, ExxonMobil Upstream Research Co, Houston, USA
R. Denys and A. Lefevre, Laboratorium Soete, Universiteit Gent, Belgium

The assessment of girth weld anomalies detected in an Argentine
gas pipeline1555
P. Rivarola, Refinor S.A., Argentina
A. Clyne, A. Wilde, and R. Peverelli, GE Energy, Oil & Gas, PII Pipeline Solutions, Argentina

Volume 4

Session 19: DEVELOPMENT OF PIPELINE STEELS 1.....1571

- Development of HFIW linepipe for offshore applications1573
B. Zimmermann, Mannesmann Line Pipe, Hamm, Germany
H. Brauer and U. Marewski, Sa;zgitter Mannesmann Forschungsinstitut GmbH, Duisburg, Germany
- Advances in the production of quality high frequency induction
welded linepipe1595
D. Simmons, Corus Tubes, Corby, UK
- Recent developments of high strength linepipes in hostile
environments1603
Y. Terada et al., Nippon Steel Corp., Kimitsu Steel, Chiba, Japan
- Development of high strength heavy wall seamless sour service
linepipe for deep sea1619
*K. Kondo, M. Hamada, and Y. Komizo, Sumitomo Metal Industries Ltd, Corporate R&D Labs,
Amagasaki, Japan*
*N. Hisamune, N. Murao, H. Osaka, and T. Murase, Sumitomo Metal Industries Ltd, Pipe and Tube
Works, Amagasaki, Japan*
- High grade linepipe for heavy sour environment1633
*N. Ishikawa, S. Endo, and T. Shinmiya, JFE Steel Corporation, Steel Research Laboratory, Fukuyama,
Japan*
T. Wada, JFE Steel Corporation, Plate Business Planning Department, Tokyo, Japan
J. Kondo, JFE Steel Corp, Fukuyama Works, Fukuyama, Japan
- The main directions of development of pipe steels and large
diameter pipe production in Russia1649
Y. Morozov, L. Efron, and S. Nastich, I.P. Bardin Institute for Ferrous Metallurgy, Moscow, Russia
- Production technique for advanced grade pipe steel1659
*Y.-Y. Shan, Y. Zhong, K. Yang and Y.-K. Wang, Institute of Metal Research, Academia Sinica, Shenyang,
China*
F.-R. Xiao, School of Materials Science & Engineering, Yan Shan University, Qinghuang-Dao, P.R. China
Y.-P. Ma, Technology and Quality Control, Angang New Steel, Anshan, P.R. China

Session 20: DEVELOPMENT OF PIPELINE STEELS 2.....1677

- Metallurgical design of advanced heavy wall seamless
pipes for deepwater applications1679
E. Anelli, D. Colleluori and M. Pontremoli, Centro Sviluppo Materiali S.p.A., Rome, Italy
G. Cumino, Dalmine S.p.A., Tenaris Group, Dalmine, Italy
A. Izquierdo and H. Quintanilla, Tenaris Group, Veracruz, Mexico
- Effect of thermomechanical processing parameters on mechanical
properties and microstructure of API-X80 grade hot rolled strips1689
K.-B. Kang, JH Bae and W.-Y. Choo, POSCO, Technical Research Laboratories, Gyeongbuk, Korea
- Effect of Cu addition on hydrogen invasion behaviour for X65 linepipe
steels in sour environments1701
T. Hara and H. Asahi, Nippon Steel Corporation, Steel Research Laboratories, Chiba, Japan
- Latest evolutions in material properties assessment of
supermartensitic stainless steels as considered by a material
fabricator1713
P. Toussaint, Industeel, Stainless Steel Development, Charleroi, Belgium
*V. Ligier, B. Bonnefois, and L. Coudreuse, Industeel, Centre de Recherche en Matériaux du Creusot,
France*
- The influence of carbon contents on the centreline segregation
intensity in continuous cast slabs and plates of steel for large
diameter pipes1727
Y.I. Matrossov, I.P. Bardin Central Research Institute for Ferrous Metallurgy, Moscow, Russia
A.O. Nosotchenko and O.B. Isayev, Azovstal Iron & Steel Works, Mariupol, Ukraine

Development and production of X70 plate steel for WEPP	1741
<i>Huang Kaiwen and L. Jinshan, China Petroleum Material and Equipment Corporation</i>	
<i>C. Qingwu, Beijing Science and Technology University</i>	
<i>W. Zhenyu, Wuyang Iron and Steel Corporation</i>	
Session 21: PIPELINE COATINGS AND CORROSION	1749
External coatings versus stones : an aggressive relationship	1751
<i>L. Valin, N. Ramambasoa, and R. Batisse, Gaz de France, Research and Development Division, Saint Denis La Plaine, France</i>	
Pipeline coatings and joint protection: compatibility considerations	1763
<i>R. Buchanan, N. Gritis and D. Taylor, Canusa-CPS, Toronto, Canada</i>	
Microbe-assisted external corrosion in oil and gas pipelines	1779
<i>L. Stanley, P. Sofos and B. L. Jones, GE Energy Oil & Gas, PII Pipeline Solutions, Cramlington, Northumberland, UK</i>	
Near-neutral pH SCC resistance of pipeline steels: effect of material and mechanical parameters	1789
<i>M. Meyer, Gaz de France, France</i>	
<i>L. Scoppio CSM S.p.A., Italy</i>	
<i>B. Rudd, Corus UK Ltd, UK</i>	
<i>S. Matthews, Advantica Technology Ltd, UK</i>	
<i>J.-P. Jansen, Europipe, France</i>	
Experience in the prediction of corrosion growth rates in oil and gas pipelines	1813
<i>P. Sofos, J. Dawson, and J. Race, GE Power Systems Oil & Gas, PII Pipelines Solutions, Cramlington, UK</i>	
Session 22: PIPELINE BEHAVIOUR	1831
An experimental and numerical study of the effect of pre-strain on the fracture toughness of linepipe steel	1833
<i>A. Cosham, Penspen Integrity and Cambridge University, Engineering Department, Cambridge, UK</i>	
<i>P. Hopkins, Penspen Integrity, Newcastle upon Tyne, UK</i>	
<i>A. Palmer, Cambridge University Engineering Department, Cambridge, UK</i>	
The influence of tensile testing method on the measured properties of high strength steel linepipe	1857
<i>N.A. Millwood, G.C. Morgan, A.M. Wood and A.D. Batte, Advantica Ltd, Loughborough, UK</i>	
Full-scale large deformation tests and ultra low cycle fatigue tests for evaluating X-80 linepipe performance.....	1881
<i>Y. Kawanishi et al., The Japan Gas Association, Tokyo, Japan</i>	
Hydrostatic testing of transmission pipelines: when it is beneficial and alternatives when it is not	1895
<i>B.N. Leis, Battelle, Columbus, USA</i>	
Mechanical damage gaps analysis	1921
<i>B.N. Leis, Battelle, Columbus, USA</i>	
<i>P. Hopkins, Penspen Integrity, Newcastle upon Tyne, UK</i>
